

EXPERIENCED CNC MACHINE OPERATOR (TURNER)

We are a progressive precision engineering company, based near Glasgow that serves oil, gas, renewable and aerospace sectors.

We are expanding and looking to appoint an experienced CNC Machine Operator (Turner) to engage in small batch production.

Your key challenges will be –

1. To operate CNC (Lathe) Machines
2. To operate Fanuc Control Machines (Mazatrol desirable but not essential)
3. To Operate Puma 300/400 Lathe's
4. To produce parts primarily for aerospace and Oil and Gas
5. To produce parts with zero/minimum waste
6. To work on own and adhere to quality systems

You will have extensive experience gained in precision engineering relating to the aerospace &/or oil & gas industry. You will have turning experience with metal components. You will be familiar with meeting tight deadlines, working to a quality system and adhering to health and safety. You will have served an apprenticeship and/or achieved qualifications/SVQ units in CNC Machining or a related area.

The successful candidate will enjoy a competitive remuneration package plus available overtime.

This is a key post in a progressive organisation,

Please apply with your CV & covering letter by the 7 May 2013 to –
